Data Source: Behavioral Risk Factor Surveillance System

Data is based on the percent of adults who reported a time during the last 12 months when they needed to see a doctor, but could not because of the cost.

% = Weighted percentage of respondents

LCL= Lower 95% confidence level of the weighted percentage

UCL= Upper 95% confidence level of the weighted percentage

All percentages are weighted to be more representative of the population of Maine and to adjust for non-response.
